Item#5111

NEBO®

SUPER CSI 16 LED FLASHLIGHT

Because the human eye recognizes the color green faster than other colors, green light is best used for map reading or signaling, especially in low light conditions. Also perfect for hunting as some game cannot see green light.

- **10 POWERFUL ULTRA BRIGHT LEDs**
  Click the Power Button 1 time for 120,000 MCD brightness.
  (LED Bulbs 110,000-plus hour life)
- **EMERGENCY FLASHER FUNCTION**
  Click the Power Button 2 times to activate 10 white LEDs in flash mode.
- **6 POWERFUL ULTRA BRIGHT GREEN LEDs**
  Click the Power Button 3 times for 72,000 MCD of green light.
  Green LEDs help maintain night vision.
- **ANODIZED ALUMINUM WATER RESISTANT BODY**
  Body designed to ensure toughness and reliability.
