- Run Time - 55 Hours (Steady ON)
  120 Hours (Flash Mode)
- 1 Meter Impact-Resistant
- Water-Resistant Body
- 2 AAA Batteries Included

No Tools Needed to Mount

The 5 Red LED Bike Tail Light by NEBO® is designed to provide maximum visibility and safety while you are riding. Two AAA batteries (included) provide 55 hours of continuous use while ON or 120 hours of continuous use for any of the 6 flash modes. The bar mount secures to the bike with no tools needed and the light has a spring clip that clips onto the bar mount. The light has a quick release to easily detach from its mount to be worn as a protective running light as well. Because bikes aren't meant to stay on the trail this light is shock-proof, water-resistant and can withstand impacts from up to 1 meter. The bulbs also are rated for 10,000 hours of life. The glow-in-the-dark button controls all of the 7 lighting modes.
