No Lenses, No Attachments, and No Accessories needed.

4 Settings

ONE HIGH POWERED LED EMITS WHITE-GREEN-RED LIGHT

• WHITE LED 100 LUMENS • GREEN LED 90 LUMENS • RED LED 85 LUMENS • WHITE LED STROBE

• 1 POWERFUL COLOR-CHANGING WHITE 100 LUMEN LED

Click the Button 1 time for 100 Lumens of white light.
(LED Bulb 110,000-plus hour life) (4 hour run time)

• 1 POWERFUL COLOR CHANGING GREEN 90 LUMEN LED

Click the Button 2 times for 90 Lumens of green light.
(LED Bulb 110,000-plus hour life) (5 hour run time)
Because the human eye recognizes the color green faster than other colors, green light is best used for map reading or signaling, especially in low light conditions. Also perfect for hunting as some game cannot see green light.

• 1 POWERFUL COLOR-CHANGING RED 85 LUMEN LED

Click the Button 3 times for 85 Lumens of red light.
(LED Bulb 110,000-plus hour life) (7 hour run time)
Red light is primarily used to preserve night vision. Best used for low-light or nighttime situations, this low-signature red light provides great contrast making it easy to read charts and maps. Red light cuts through smoke better than white light, does not interfere with night vision technology, ensures stealth in the dark and cannot be easily seen by the human eye over long distances.

• DEFENSIVE STROBE

From the previous mode, click the button 2 times or soft touch 1 time to activate the defensive strobe.
(Viewing Distance - 80 meters)

Actual Size

• STEEL BELT/POCKET CLIP

Allows you to keep this flashlight handy and provide the versatility to clip it on your cap for hands-free lighting.

• UNBREAKABLE SHATTER-PROOF POLYCARBONATE LENS

• AGGRESSIVE SELF DEFENSE FACE

The aggressive design face can be used to defend yourself. (Please use caution when using flashlight.)

• ANODIZED AIRCRAFT GRADE ALUMINUM WATER-RESISTANT COMPACT BODY DESIGN

Designed to fit almost anywhere, the body is virtually indestructible to ensure reliability.

• GLOW-IN-THE-DARK BUTTON

This button allows you to easily switch settings* while maintaining constant control of the flashlight. The button also glows in the dark so that you can easily find this flashlight. *(*Button uses hard/soft touch technology allowing settings to be changed in two different ways.)*
Hard touch: Simply click through the functions (light will turn off in between settings.) NOTE: Light will reset to first setting (100% ON) after being off for 10 seconds.
Soft touch: Press button halfway with no click. This allows the user to cycle through the settings quickly without the light turning off between settings.
